Summary

Computer Engineering student at VIT with skills in Web Development, Python, and Data Structures. Certified by CDAC and experienced in projects spanning game development, data analysis, and web applications. Completed a cybersecurity internship focused on vulnerability assessment. Familiar with tools in Cloud Computing and Data Analytics. Aiming to leverage my background to grow as a Data Analyst.

Skills

- **Programming & Development:** Python, C , C++, Java
- **Backend & Database:** Flask, MySQL
- **Web Technologies:** JavaScript, React, Bootstrap
- **API & Data Handling:** API Integration, Web Scraping, NLP
- **Data Analytics & Structures:** Excel, Data Structures and Algorithms (DSA)
- **Data Visualization:** Power BI
- **Cyber-Security Tools :** Burp Suite, Google Dorks, Basic VAPT (XSS, CORS, Rate Limiting), Vulnerability Testing

Projects

- **Music Player Website** – Built an interactive music player with a user-friendly UI, enabling seamless online music playback.
- **Stock Price Notifier** – Automated notifications for stock price changes using secure user authentication and real-time data processing.
- **Grocery Store Management System** – Developed an inventory management system with real-time order tracking, improving operations and customer experience.
- **Video Dubber** – Created a real-time video dubbing application with audio syncing for video editing and accessibility.
- **Movie Search App** – Designed a dynamic movie search platform using React and the OMDb API, allowing users to find movies by title and view details like posters, release year, and descriptions.
- **Flappy Bird Clone** – Implemented the popular Flappy Bird game in Python, integrating smooth game logic and engaging graphics.

Education

B.Tech in Computer Engineering

Vidyalanakar Institute of Technology

📅 2026

📍 Mumbai

HSC (71%) | JEE Mains (93 percentile)

New Horizon Public School

📅 2022

📍 Panvel

Experience

Security Analyst Intern

Secure Cyber Future | June – August 2025

- Performed security testing on websites to identify XSS, CORS, and rate-limiting issues using Burp Suite and Google Dorks.
- Documented vulnerabilities with screenshots, payloads, and suggested fixes.

Smart India Hackathon 2023 - VIT

- Built a video dubbing solution to translate educational videos, improving accessibility for diverse learners.

Interests

Extracurricular Activities

Demonstrated excellence in keyboard and football as extra-curricular activities.
